# MILK REPLACER

## PRODUCT INTRODUCTION

Our Natpure Milk Replacer, also known as fat-filled milk powder, is made from specially formulated and processed milk powder that has exceeded its shelf life. It has been enhanced to be highly digestible and provide excellent levels of essential amino acids, helping to provide important nutrients for piglets and calves.

Nature Milk Replacer decreases the risk for secretory diarrhoea compared to those products with simple sugars. The milk fat in our product is high in short-chain fatty acids which are an effective energy source for intestinal walls. This replacer therefore provides a comprehensive and balanced nutrition for growing piglets / calves.
